

IV. Compound Cross-Draft Carburetor for Model 190 SL

A. General

Model 190 SL is equipped with two Solex carburetors Type 44 PHH. These horizontal compound carburetors are also known as cross-draft carburetors and have been developed for sports cars with high maximum speeds. They incorporate the latest advances in carburetor design (Figs. 07-0/28 and 07-0/29).
